Boston Acoustics Announces the TVee One Television Speaker Base that Delivers Powerful, Clear Sound for Today's Televisions

The TVee One Speaker Base is a great alternative to the traditional sound bar including its ease-of-placement fitting directly under the TV

Kleinburg, Ontario October 2, 2013 – Boston Acoustics®, a world-renowned manufacturer of innovative home entertainment solutions and [high-performance loudspeakers](#), is pleased to announce the launch of the new TVee® One under-TV sound system that dramatically improves your television watching experience. The all-in-one system simply connects easily to your television with one cable so you can enjoy rich, room-filling sound from your favorite TV shows, movies, games and music. Engineered to hold up to 60 pounds, the TVee One (retail price \$349) fits perfectly under most TVs up to 50 inches. Elegantly styled and simple to use, the TVee One is a great alternative to a traditional sound bar.

“As today’s flat-panel TVs get thinner and thinner, so does their sound quality,” said Paul Belanger, product manager for Boston Acoustics. “The new TVee One offers consumers a simple way to raise their televisions’ audio performance to the same high level as the video—creating a more powerful and enjoyable home-theater environment in any room. The TVee One is designed to hold medium to large-flat screen TVs and offers a host of high-performance components to deliver intense, enveloping sound.”

High-Performance Sound

The TVee One speaker base features dual 2-inch by 5-inch hyperbolic high-rigidity transducer (HHRT) drivers and dual half-inch dome tweeters that produce a wide range of sound, with deep bass and clear high frequencies and excellent voice reproduction.

Wireless Streaming with Bluetooth & aptX

The TVee One features Bluetooth with aptX® allowing for CD quality wireless music streaming from any compatible Bluetooth device, such as a smartphone, tablet or computer (with Bluetooth A2DP capability).

Dolby Digital and Virtual Surround

The built-in Dolby Digital decoding makes consumers' favorite movies and shows come alive. And the TVee One delivers enveloping surround sound via Boston's Virtual Surround processing which uses advanced psychoacoustic algorithms to simulate the surround sound of a multi-channel home theater speaker system.

Five Sound Modes and Night Mode

The TVee One features custom sound modes tailored for different types of listening, rooms and personal preference. You can choose Movie or Movie Wide mode for enjoying movies and television shows with surround soundtracks from Dolby and dts. The Music and Music Wide modes are ideal for music listening and the Dialog mode is perfect for TV shows, newscasts and sporting events with a lot of dialogue content. The TVee One also offers Night Mode, which enables high-fidelity sound while minimizing the annoying jumps in volume for late-night TV watching to not disturb the household.

Ease of Use and Auto Input Switching

The TVee One connects directly to the television with the included optical or analog cable. The auto input switching feature automatically chooses the best available audio source.

Structural Design

Less than 3" tall, the TVee One is designed to hold bases up to 21.5" wide and 13" deep. This includes most televisions up to 50".

Smart Remote Control

The TVee One comes with its own remote control, but it can also learn your TV or service provider remote control commands. With this capability, you can control the TVee One with the remote you are already accustomed to using.

What's in the Box

The TVee One includes a TV speaker base, a remote control, a detachable power cord, an optical digital audio cable, a 1/8" stereo analog audio cable, a 1/8" to RCA cable adapter, an owner's manual and a quick-start guide. The TVee One is also backed by a limited one-year warranty.

The TVee One has a suggested retail price of \$349 and is available at select dealers and online at www.bostonacoustics.com.
