

# High Humidity Weather-Resistant Custom Speakers

in-ceiling

play invisible. play smart.

Boston Acoustics Weather-Resistant Custom In-Ceiling Speakers are designed for outstanding durability and exceptional sonic performance. These weather-resistant speakers can be used in bathrooms and other moist interior locations as well as exterior locations that include some protection from the elements.

## Rigorously tested

Boston Acoustics High Humidity models go through an exhaustive life test that submits the speakers to many years of exposure to the elements. The loudspeakers are designed to pass the internationally recognized IEC529 and Mil Spec 810. These tests simulate approximate climatic conditions and provide an indication of the degrees of weather resistance. Boston Acoustics further submits these models to long term in-use testing throughout the country.

## Key features

- Weather and high-humidity resistant materials ideal for bathrooms, saunas, and porches
- Dual Voice Coil Deep Channel® Design (DCD) woofers for more bass from less amplifier power
- Dual Boston-designed tweeters for crystalline high-frequency sound
- Inputs for both left and right channels—plays stereo signal from a single location

## What it means to be from Boston

First and foremost, Boston is an engineering company, and every Boston system is optimized to meet the highest performance standards (our own). Of course, performance is only one measure of value. So we're careful to build all our products with strict attention to everything from the choice of materials to the details of fit and finish. It's how we've been exceeding the expectations of serious listeners for more than thirty years.
